

Home Health

Predictable, Compliant Home Study Visits

Tryal Home Health solves the real challenges of remote or hybrid clinical studies. We give sponsors and CROs a clear, reliable way to manage home visits and enable high-quality data collection.

Real-Time, Validated Home Health Data

Transform your decentralized trials with intelligent e-source data capture that validates information at the point of care. Experience automated edit checks, source data verification, and seamless integration.

Global Compliance

Fully comply with international regulatory standards, including 21 CFR Part 11, ensuring robust data integrity and security. With e-signature capabilities, you can confidently manage secure, compliant recruitment across multiple countries, streamlining the process while meeting global regulatory requirements.

Smart Staffing

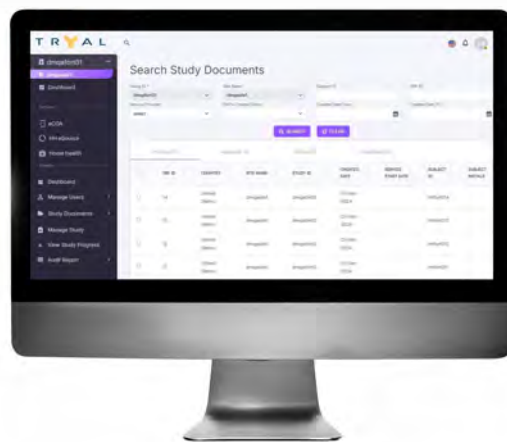

Easily schedule primary, backup, and emergency providers to ensure uninterrupted coverage for all remote visits.

Configurable Workflows

Enforce clear, consistent standards for home visits, globally. No surprises or inconsistencies in the process so you can feel confident in your study outcomes.

Provider Screening and Credential Verification

Streamline service provider credential verification and approval. Our system offers a seamless, standardized workflow for uploading and validating licenses and certifications required to meet protocol and regulatory requirements. By replacing outdated, paper-based methods, sponsors and CRO's will reduce inconsistencies, save time, and minimize the risk of failed remote visits.

Experience the Difference
