# eConsent

Simple, Powerful, Personal

## Break Down Barriers between Research and Participants

We make it quick and easy for sites to enroll participants in a study – and keep them informed throughout.

Our solution turns the manual consent process into one that is instantly traceable for sponsors, and more understandable, and empowering for participants.

## A Smarter Way Forward

At Tryal, your success is our priority. From the first conversation to the final data set, we're committed to removing barriers and simplifying every step of the process.

## Crystal-Clear Understanding

Enable participants to better understand the study and what it means for them. Offer videos, interactive graphics, and access to more detailed explanations, along with content that is customized for different languages and cultural contexts.

## Lightning-Fast Setup

Move quickly, but confidently from study protocol to active recruitment in record time. Easily manage multiple consent versions and languages with a streamlined localization process. Experience faster study deployment without compromising accuracy or compliance.

## Global Compliance

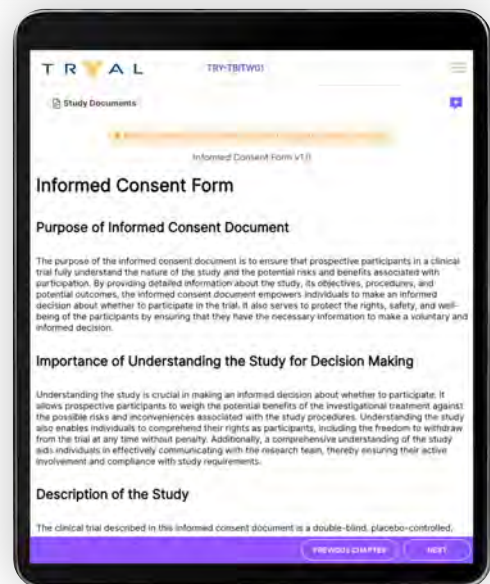

Fully comply with international regulatory standards, including 21 CFR Part 11, ensuring robust data integrity and security. With e-signature capabilities, you can confidently manage secure, compliant recruitment across multiple countries, streamlining the process while meeting global regulatory requirements.

## Anytime, Anywhere Access

Allow participants to sign consent from their phone, tablet, or computer so you have real-time access to consent documentation—no paperwork, no delays, no hassle.

## Real-Time Visibility

Track every consent interaction instantly with complete transparency and security. Get immediate status updates and comprehensive audit trails throughout the entire consent process.

## Experience the Difference

Contact us today to learn how Tryal solutions can help your team accelerate studies with confidence.
